St. Paul, Minnesota 55155

DATE: May 10, 2010

TO: Trns•port End User Designees and User Group Representatives

SUBJECT: Discontinuance of Trns•port FieldPad Licensing Effective June 30, 2011

The Trns•port Task Force (TTF) would like to inform the Trns•port User Community of a decision reached in coordination with the Michigan Department of Transportation and Info Tech, Inc. to discontinue the maintenance, support, and availability of the Trns•port FieldPad component of the Trns•port FieldManager suite of software. At the Trns•port Task Force's request, Info Tech surveyed the Trns•port FieldManager licensee base and confirmed there was not a demand for the Trns•port FieldPad software or support.

The latest release of Trns•port FieldManager issued earlier this year contains the last planned release of Trns•port FieldPad. To minimize the chance of any impact to the member agency licensees, the TTF intends to provide support for any existing Trns•port FieldPad users through June 30, 2011.

If you have any questions regarding the discontinuance of Trns•port FieldPad, please do not hesitate to contact me or any other member of the TTF.

Kindest Regards,

Todd Bergland
AASHTO Trns•port Task Force Chair
